Abstract

The purposes of research were to develop the reading skill with local contents by using interactive learning, compare the achievement of English reading skill of Matayom Suksa 1 and survey the opinions towards the local content by using interactive learning. The subjects were thirty Matayom Suksa 1 students at Wanglinfla Witayakhom School under the office of Kalasin Education Service Zone 2. They were selected by the purposive random sampling technique. The research instruments were based on local contents ,lesson plan by using interactive learning , achievement test , and questionnaire. The research statistics used were mean , percentage , standard deviation and the dependent samples of *t*-test .

Results of this research were as follows :

1. According to the data , it indicated that the value of efficiency based on local contents by using interactive learning was higher than the standard criteria. The value was 82.10 / 82 .08
2. In regard to the achievement of English reading , it was found that the scores of the English reading skill after using the local contents by using interactive learning were significantly higher than before using at .01.
3. In regard to the satisfaction, it was found that the average degree of the satisfaction with the local contents by using interactive learning was high.
